

The 13th International Symposium on Plasticity
Hotel Aleyeska, Anchorage, Alaska
June 2-6, 2007

www.neat-plasticity.com

Plasticity 2007 will include a

Mini-symposium on Solid-Solid Phase Transformations

This mini-symposium will encompass analytical, experimental, and computational studies of solid-solid phase transformations. Topics of interest include, but are not limited to: nucleation, phase transformation kinetics, microstructure evolution, phase stability, surface and size effects, shock wave induced transformations, and the coupling of phase transformations and plastic flow.

Please forward this announcement to colleagues who may have an interest in attending this mini-symposium. Researchers planning to participate should e-mail a half-page abstract to me by January 1, 2007. If you have any questions, please do not hesitate to contact me.
